

DinaTEL3 APP

THE PRODUCT

The DinaTEL3 application for smartphones and tablets lets you display and manage the data from the weight indicator. The DinaTEL3 App can be downloaded for free from Google Play and App Store.

FUNCTIONALITY AND ADVANTAGES

- Android compatible
- Basic weighing functionality and with alarm;
- Recipe execution and downloading programs;
- Ability to block the weight and print or save the data;
- Customer code can be set with multicarriage management or with specific recipes;
- Audible signal during working phases like the indicator alarm;
- Built-in guided procedure for immediate device diagnostics;
- Direct keypad to eliminate menu navigation time;
- The same user interface as the indicators;
- Ability to control several indicators with the same DinaTEL 3 application;
- Can operate simultaneously with other wireless devices in the Bluetooth network;
- If the operator leaves the coverage area, the system automatically recovers the information when he returns to the area;
- The DinaTEL 3 application uses the same languages as the indicator.

The DinaTEL 3 App OFFERS:

- Compatibility with indicators DG500, DG600, DG8000IC.
- Ability to insert in the Bluetooth network (wireless network for accessories without interference)
- Operating area 100 metres x 360°.
